STAINLESS STEEL CARTS AND CUSTOM CARTS

C. Nelson is a stainless steel fabricating shop. If you don't see what you want on our other pages, just ask. We can build it.

We stock the JJ326 and offer a smaller cart, too. Model JJ326, also known as a Pretzel Cart, includes a power outlet and a light in the canopy. JJ326 can be used with any aftermarket pretzel warmer, pizza warmer, cotton candy machine, popcorn popper, coffee and the list is endless. Printed graphics are an option.

Self-contained sinks are available with a single hand washing bowl, as a 3 bowl utensil washing station, or a combination of both. Customer sizes are available.

We build many custom made to order stainless carts like the coffee cart shown on the following pages.
