## The Hi\_R Value Cart

The Hi\_R value cart is the high-tech ice cream cart of the 21st century. It incorporates vacuum insulation technology, increasing the insulation value (the "R" factor) by nearly twice the insulation of comparable carts insulated with poured urethane foam.

The result is a high-performance cart that exceeds Energy Star efficiency standards, is lighter than conventional carts of similar size, achieves -40 degree temperatures, and has comparable holdover to our standard BDC8.

These carts are made of stainless steel on the interiors to stay clean and sanitary forever with the outside shells of aluminum, reducing weight and improving the recycling value of the cart when it inevitably needs to be disposed.

The continuous style graphic wrap saves you money & time.

NEW TOO! With all carts, Nelson will provide our new integral built-in lock system and a padlock, too. No lock bars required.

*The HiR cart is the most energy-efficient ice cream cart produced on the planet*
