Custom Mobile Scooping Carts

Nelson Mobile scooping carts are designed for use ANYTIME or ANYWHERE

The mobile carts shown on these pages are the most common configurations we produce. If you don't see what you want, just ask.

Links to NSF and ETL showing our listings, if needed for your local health department, can be seen on our website,

We at Nelson do not simply buy an inexpensive store freezer and turn it into an outdoor cart. We build our carts from the ground up in Oak Harbor, Ohio, and build them to last and perform in the heat of the outdoor summers.

Our sink systems are approved by NSF, LA County and Clark County, Nevada. Should you need specific information for those locales, Call or e-mail.

Our ice cream, Italian Ice or Gelato carts can be made with stainless steel flip lids (recommended for outdoor use) or with an open-top as a visual dipping cabinet. While we recommend the stainless steel flip lids for outdoor use, the visual display model can come with optional sliding lids that will help the ice cream freezer hold temperature outdoors, and is easily added or taken off to suit the conditions. For instance, the same cart can be used as a visual display ice cream dipping cart in a sports arena or convention center or the sliding lid set can be added for use outdoors if conditions require.

With a digital temperature control, standard on all dipping carts, you can easily use the same cart for a wide variety of products, from the warmer temperatures of soft frozen water ices or Italian ice, to gelato, or ice cream products requiring temperatures of -20 degrees or colder. The digital temperature control allows for the precise setting of the temperature 1 degree at a time.
